Digital Transformation Driven By Medtech

Chi-Huey Wong, President of IBMI

The Healthcare+ Expo spurs collaborations between sciences, technologies, clinical research and medicine, and accelerates breakthroughs and evolutions of Taiwan's healthcare industry.

Barry Lam, Vice President IBMI

Digital transformation involved AI, 5G and cloud computing ushers in a new era for healthcare. The Expo is the best place to see novel technologies and applications of the above and find vigorous sectors to partner with.

Pan-Chyr Yang, Vice President IBMI

Medical doctors who have invented problem-based solutions are now entrepreneurs who have added the momentum to the healthcare industry. Their exhibits here will ignite new ideas and new businesses.

Chang-Hai Tsai, Vice President IBMI

Clinical experience, data-based evidences, scientific discoveries and cross-disciplinary collaborations that hospitals have made would be the engine of growing new industries and international partnerships.

Create A Global Ecosystem For Healthcare Digital Transformation

President Tsai Ing-Wen

Hospitals play a pivotal role in bringing together the upstream-downstream supply chains, together they can drive the overall industry development forward and pave the way for Taiwan to develop opportunities and build partnerships with industries worldwide that are embracing digital transformation in healthcare.

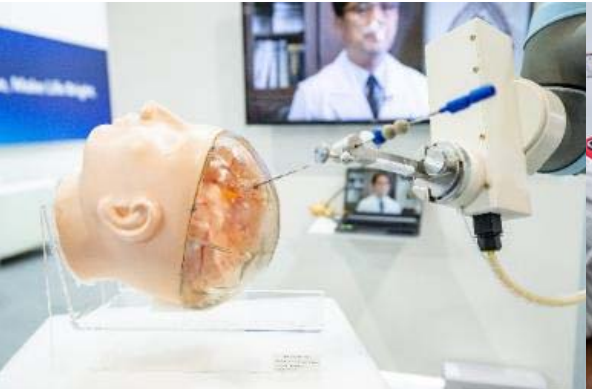
Minister You Si-Kun, Legislative Yuan / President to the Expo General Assembly

We at the Expo aim to cement the link between Taiwan’s healthcare and semiconductor sectors, channel them into global strategic alliances to collectively create, nourish an ecosystem in which digital technologies in healthcare thrive.

Medical Specialties

The excellence shown in medicine, medical specialties.

The pavilion demonstrated a full array of Taiwanese hospitals by and across medical specialty in diagnostics, complex surgery, cancer treatment, and substantial developments of techniques and approaches applicable to therapeutics.



- Advanced cancer therapeutics
- Robotic & minimally-invasive surgery
- Regenerative medicine, gene therapy
- Genetic testing, screening of health risk
- Health management, personalised care

Smart Hospital, Medical Devices & Equipment

More industries lined with applications in healthcare.

Being essential parts to treat patients and deliver health services, the exhibits covered from hospital management, surgical solution, digital pathology to telemedicine powered by 5G communication, and SaMDs developed with AI/ML.

- 5G in healthcare, contactless technology
- Medical display, surgical solution
- Hand-held ultrasound, AI-assisted diagnosis
- Organ-on-a-chip, digital dentistry
- Hospital IT, workflow optimisation
- Contracted services for medical devices

Diagnostics, Pharmaceuticals & Cell Therapy

Predict, prevent, or precisely treated.

Diagnostics lays the foundation of making a clinical decision. The latest development and advancement- both for individual health and commercial use- were on display, ranging from digital pathology, liquid biopsy, bone marrow counting to cell manufacturing & storage.

- IVD devices, microfluidic chips
- Cancer screening, pharmacogenomic testing
- Cell products & cell therapy services
- CRO, CMO & CDMO
- Lab apparatus, reagents, workflow automation

Smart Health Tech & Preventive Medicine

Technologies and products boosted health.

A broad spectrum of consumer products are designed to empower our control of health. Fit-for-purpose products brought to this pavilion were using emerging technologies to continuously monitor health risk or help people regain mobility.

- Smart, connected wearables
- Health management APPs
- At-home health screening
- Rehabilitation & physical therapy products
- Health & nutrition supplements
- Personal hygiene, smart home appliances

Sports Health & Healthy Ageing

Stay healthy, both mentally and physically.

The pandemic-driven at-home workouts and new life styles spurred new businesses and new solutions. Smart housing for the elderly and disables, training gears and apps, dietary advices, were here to engage a much bigger cohorts with awareness of staying health.

- Gym / at-home workout equipment
- Sports nutrition, health diets
- Functional clothing and accessories
- Sports medicine, sports technology
- Weight training, anti-ageing care products
- Chronic disease prevention and management

Bio-Agriculture & Food Safety

Health-centred, value-added, eco-friendly agribusiness.

Bio-agriculture in modern ways of applications presented a mixture of organic farming, food science, herbal extracts, and gardening. The sector is now a reliable CRO source for preclinical trials and is made a partner to industry-academia collaborations.

- Nutrition food raw materials, & ingredients
- Certificated local produce
- Food safety examination, services
- Gardening products and applications
- Specific pathogen free swine programme

Special Exhibitions

Medical AI displayed 31 applications in areas of diagnosis and analysis of pancreas cancer and heart disease, digital pathology, 3D-glasses-free imaging technology, as well as at-home health monitoring, to better productivity, efficiency and patient safety.

Inno Zone was a dedicated space for the National Innovation Award winners and candidates to showcase 170 items and projects. There were 75 teams and startups, exhibiting as per six categories: “Medical Devices & Precision Diagnosis”, “Clinical Technologies & Products”, “Health AI & Technologies”, “Agriculture, Food, Environmental Science and Specific Chemic Applications”, “New Drugs and Vaccines”, and “Accounting & Taxation”.

Medical AI Application

Inno Zone

Global Healthcare Supply Chain Forum: Reboot and Rebuild

The forum explored the impact on and opportunities for supply chain resilience, with country-specific topics as follows.

1) Taiwan-Thailand on Supply and Demand for Medical Devices
2) Taiwan-Israel on COVID-19 Drug and Cell Therapy
3) Taiwan-Poland on Health Industry, Eyeing on Eurasian Market Expansion and Collaboration
4) Taiwan-Japan on Innovation and Collaboration in Therapeutics

Global Participation 2021

- ABLE (India)
- FTI MeDIC (Thailand)
- IATI (Israel)
- JPLA (Japan)
- Korea BIO
- PARP (Poland)
- THAIMED (Thailand)
- IDB, MOEA Taiwan
- DCB, Taiwan
- MIRDC, Taiwan
- And Foreign Offices in Taipei, representing Israel, Poland and Thailand

MEDTEX Summit Asia

Unleash the Power of Semiconductor: The New Era of Digital Health Technologies

From CPUs, GPUs to healthcare ASICs, from AI, HPC to 5G, from telecare to mobile health applications- the forum discussed how semiconductor technologies empowered and changed the face of the healthcare industry, sparked and incubated medical innovations and shaped the future of digital transformation in healthcare at a lightspeed.

Global Participation 2021

- Wistron
- Acer
- PSMC
- Asus
- Wistron Medical
- Intel
- Microsoft
- Supermicro
- SEMI, Taiwan
- NCKU Hospital
- SanCode Foundation

Cancer Treatment in APAC

Therapeutics, Diagnosis and Global Competitiveness

The forum looked at three areas of strength that Taiwan has in terms of cancer treatment, inviting multinational brands representing pharmaceuticals, biotech and medtech, together with industry experts from the healthcare authorities, hospitals and private sectors, to collectively envisage a business model that would work for Taiwan to expand its global footprint in the realm of precision medicine and cancer treatment.

Global Participation 2021

- TFDA / MOWH, Taiwan
- Siemens Healthineers
- Varian
- Roche
- Illumina
- StemCyte
- TSH Biopharm
- Hermes Advanced Therapy Systems
- Chunghwa Telecom
- Quanta Computer
- Far EasTone Telecommunications
- Taipei Cancer Center
- Chang Gung Memorial Hospital, Linkou
- China Medical University Hospital
- National Taiwan University Cancer Center
- Hualien Tzu Chi Hospital
- Shin Kong Wu Ho-Su Memorial Hospital
- Kaohsiung Medical University Chung-Ho Memorial Hospital
